The screenshots illustrate the following steps in the 'Library V1' application:

- Initial State:** The application is running at `http://localhost:8080/04aBookServer`. The 'Conn' button is highlighted.
- Connection:** The 'Conn' button is clicked. The status bar shows 'connection set, but not proofed'.
- Find Book:** The 'Get Book' button is clicked. The 'book-id' field is set to '11', 'book title' is 'Räuber Hotzenplotz', and 'book author(s)' is 'Ottfried Preussler'. The status bar shows 'book found'.
- List Books:** The 'Get All Bks' button is clicked. The status bar shows 'books listed'. The table displays the following data:

id	title	author(s)
33	Hercule Poirot	Agatha Christie
22	Schatz am Silbersee	Karl May
11	Räuber Hotzenplotz	Ottfried Preussler

- Add Book:** The 'Add Book' button is clicked. The 'book-id' field is set to '44', 'book title' is 'Heimaterde', and 'book author(s)' is 'Hans Ernst'. The status bar shows 'ok'.
- Error:** The 'Add Book' button is clicked again. The status bar shows 'error: book.id already used'.
- Update Book:** The 'Update Book' button is clicked. The status bar shows 'books listed'. The table displays the following data:

id	title	author(s)
33	Hercule Poirot	Agatha Christie
22	Schatz am Silbersee	Karl May
11	Räuber Hotzenplotz	Ottfried Preussler
44	Hans Ernst	Heimaterde
